

Bovine Embryo Culture Medium

One-Step Bovine Embryo Culture System

- 1 IVM**
Ready-to-use sterile culture medium specifically designed for in vitro maturation of bovine oocytes, effectively enhancing maturation and fertilization rates.
- 2 IVF**
Fully supports sperm capacitation and bovine IVF, maximizing oocyte fertilization and subsequent embryonic development rates.
- 3 IVC**
One-step in vitro culture medium for fertilized oocytes, providing embryos with sufficient nutrients and a stable environment for development.
Product specifications: 5 mL/bottle, 2 bottles/box
Custom specifications available upon request.

Embryo Culture Oil

Embryo Culture Oil
500 mL/bottle/box

Embryo culture oil is a ready-to-use sterile product used to overlay culture media during embryo culture, helping to maintain and stabilize the pH and osmotic pressure of the culture medium. It can also be used in ICSI, assisted hatching, and embryo biopsy procedures. This high-quality, sterile mineral oil is specifically designed for embryo culture. Product specifications: 500 mL / 100 mL / 50 mL Custom specifications available upon request.

Sperm Selection Gradient Kit

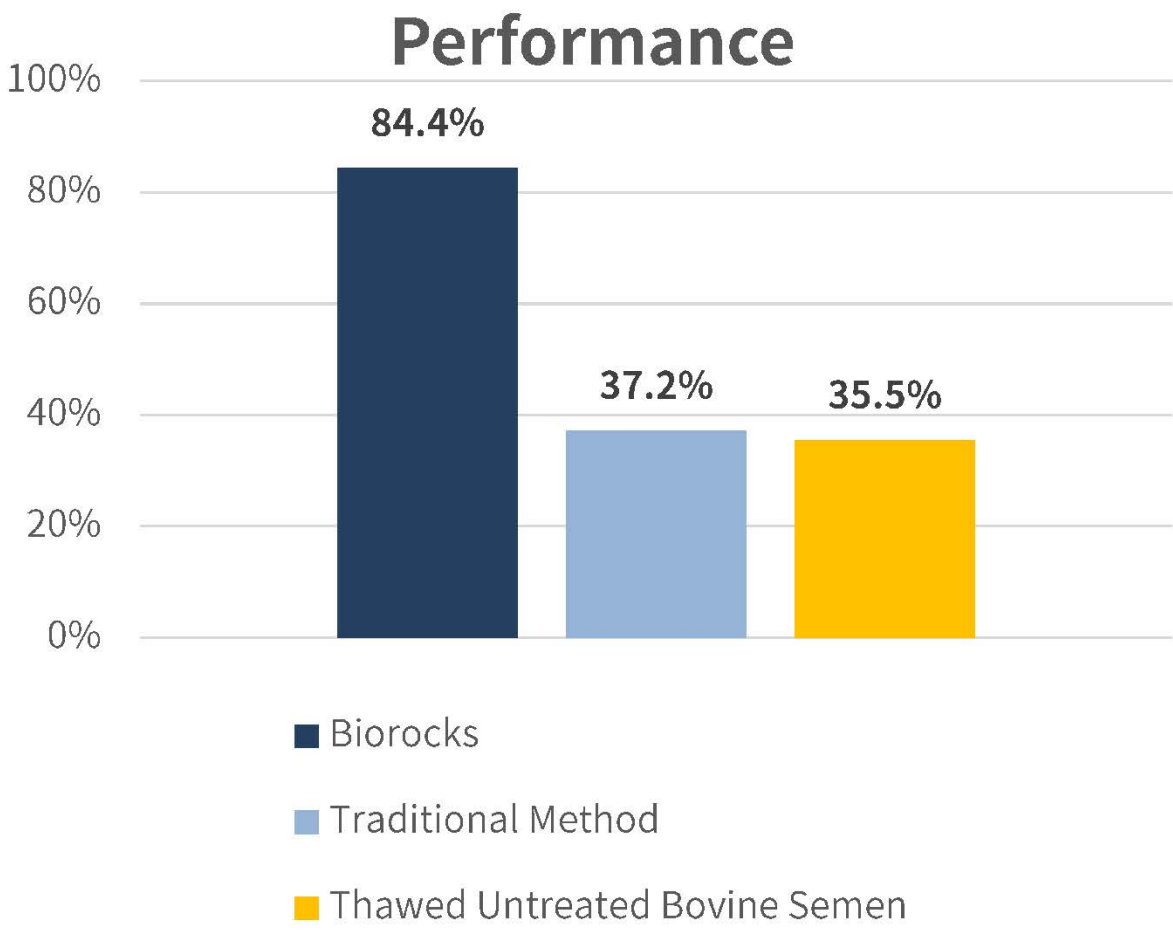

Sperm Selection Gradient Medium is a combined gradient solution with wide applicability and simple, flexible operation. It is used to separate motile sperm from cells, subcellular particles, bacteria, and viruses in semen. The medium has uniform osmolality, low viscosity, and mild separation conditions, ensuring no toxicity to cells.
Product specifications: 100 mL/bottle/box
Custom specifications available upon request.

OPU

Ready-to-use Ovum pick-up medium.
Product specifications: 500mL per bottle per box
Custom specifications available upon request.

OPU

Wash

Ready-to-use wash medium for maintaining oocyte and embryo stability during handling and micromanipulation..
Product specifications: 50mL per bottle per box
Custom specifications available upon request.
